Black Holes in Higher Dimensions

Black Holes in Higher Dimensions

Black holes are one of the most remarkable predictions of Einstein's general relativity. In recent years, ideas in brane-world cosmology, string theory and gauge/gravity duality have motivated studies of black holes in more than four dimensions, with surprising results. In higher dimensions, black holes exist with exotic shapes and unusual dynamics. Edited by leading expert Gary Horowitz, this exciting book is the first devoted to this new field. The major discoveries are explained by the people who made them: Rob Myers describes the Myers–Perry solutions that represent rotating black holes in higher dimensions; Ruth Gregory describes the Gregory–Laflamme instability of black strings; and Juan Maldacena introduces gauge/gravity duality, the remarkable correspondence that relates a gravitational theory to nongravitational physics. Accessible to anyone with a standard course in general relativity, this is an important resource for graduate students and researchers in general relativity, string theory and high energy physics.

From reader reviews:

Frances Feist:

Do you have favorite book? When you have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each guide has different aim or maybe goal; it means that e-book has different type. Some people truly feel enjoy to spend their the perfect time to read a book. These are reading whatever they take because their hobby is usually reading a book. Consider the person who don't like reading through a book? Sometime, person feel need book after they found difficult problem or exercise. Well, probably you will require this Black Holes in Higher Dimensions.

Jill Goulet:

The book Black Holes in Higher Dimensions can give more knowledge and also the precise product information about everything you want. So why must we leave a very important thing like a book Black Holes in Higher Dimensions? Wide variety you have a different opinion about e-book. But one aim that will book can give many information for us. It is absolutely right. Right now, try to closer with the book. Knowledge or data that you take for that, it is possible to give for each other; you can share all of these. Book Black Holes in Higher Dimensions has simple shape but the truth is know: it has great and big function for you. You can appear the enormous world by start and read a e-book. So it is very wonderful.

Tony Sanford:

As people who live in the particular modest era should be upgrade about what going on or facts even knowledge to make all of them keep up with the era which can be always change and move ahead. Some of you maybe may update themselves by studying books. It is a good choice for you personally but the problems coming to an individual is you don't know what one you should start with. This Black Holes in Higher Dimensions is our recommendation to make you keep up with the world. Why, because this book serves what you want and need in this era.

Albert Shepherd:

This book untitled Black Holes in Higher Dimensions to be one of several books in which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy this particular book in the book shop or you can order it by means of online. The publisher with this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Smart phone. So there is no reason to your account to past this e-book from your list.
