Problems and Proofs in Numbers and Algebra

Richard S. Millman, Peter J. Shiue, Eric Brendan Kahn

Problems and Proofs in Numbers and Algebra Richard S. Millman, Peter J. Shiue, Eric Brendan Kahn Focusing on an approach of solving rigorous problems and learning how to prove, this volume is concentrated on two specific content themes, elementary number theory and algebraic polynomials. The benefit to readers who are moving from calculus to more abstract mathematics is to acquire the ability to understand proofs through use of the book and the multitude of proofs and problems that will be covered throughout. This book is meant to be a transitional precursor to more complex topics in analysis, advanced number theory, and abstract algebra. To achieve the goal of conceptual understanding, a large number of problems and examples will be interspersed through every chapter. The problems are always presented in a multi-step and often very challenging, requiring the reader to think about proofs, counter-examples, and conjectures. Beyond the undergraduate mathematics student audience, the text can also offer a rigorous treatment of mathematics content (numbers and algebra) for high-achieving high school students. Furthermore, prospective teachers will add to the breadth of the audience as math education majors, will understand more thoroughly methods of proof, and will add to the depth of their mathematical knowledge. In the past, PNA has been taught in a "problem solving in middle school" course (twice), to a quite advanced high school students course (three semesters), and three times as a secondary resource for a course for future high school teachers. PNA is suitable for secondary math teachers who look for material to encourage and motivate more high achieving students.

From reader reviews:

Lucille Daulton:

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite e-book and reading a book. Beside you can solve your condition; you can add your knowledge by the book entitled Problems and Proofs in Numbers and Algebra. Try to face the book Problems and Proofs in Numbers and Algebra as your close friend. It means that it can to get your friend when you sense alone and beside that of course make you smarter than ever. Yeah, it is very fortuned for you. The book makes you more confidence because you can know every little thing by the book. So , we need to make new experience and knowledge with this book.

Richard Broderick:

Do you one among people who can't read satisfying if the sentence chained inside the straightway, hold on guys this aren't like that. This Problems and Proofs in Numbers and Algebra book is readable by simply you who hate those straight word style. You will find the information here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to deliver to you. The writer connected with Problems and Proofs in Numbers and Algebra content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different by means of it. So , do you even now thinking Problems and Proofs in Numbers and Algebra is not loveable to be your top collection reading book?

Silvia Doucet:

This Problems and Proofs in Numbers and Algebra are reliable for you who want to be described as a successful person, why. The main reason of this Problems and Proofs in Numbers and Algebra can be one of many great books you must have is giving you more than just simple examining food but feed anyone with information that possibly will shock your earlier knowledge. This book is handy, you can bring it all over the place and whenever your conditions both in e-book and printed versions. Beside that this Problems and Proofs in Numbers and Algebra forcing you to have an enormous of experience for instance rich vocabulary, giving you test of critical thinking that could it useful in your day action. So , let's have it and luxuriate in reading.

Regina Hash:

A lot of people always spent their own free time to vacation or perhaps go to the outside with them household or their friend. Do you know? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. If you need to try to find a new activity that's look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you read you can spent the whole day to reading a guide. The book Problems and Proofs in Numbers and Algebra it is extremely good to read. There are a lot of folks that recommended this book. They were enjoying reading

this book. In case you did not have enough space to develop this book you can buy often the e-book. You can m0ore effortlessly to read this book through your smart phone. The price is not to cover but this book offers high quality.
