**Apache Cookbook** Rich Bowen, Ken Coar

Apache is far and away the most widely used web server platform in the world. Both free and rock-solid, it runs more than half of the world's web sites, ranging from huge e-commerce operations to corporate intranets and smaller hobby sites, and it continues to maintain its popularity, drawing new users all the time. If you work with Apache on a regular basis, you have plenty of documentation on installing and configuring your server, but where do you go for help with the day-to-day stuff, like adding common modules or fine-tuning your activity logging? The *Apache Cookbook* is a collection of problems, solutions, and practical examples for webmasters, web administrators, programmers, and everyone else who works with Apache. For every problem addressed in the book, there's a worked-out solution or "recipe"--short, focused pieces of code that you can use immediately. But this book offers more than cut-and-paste code. You also get explanations of how and why the code works, so you can adapt the problem-solving techniques to similar situations. The recipes in the *Apache Cookbook* range from simple tasks, such as installing the server on Red Hat Linux or Windows, to more complex tasks, such as setting up name-based virtual hosts or securing and managing your proxy server. The two hundred plus recipes in the book cover additional topics such as:

- Security
- Aliases, Redirecting, and Rewriting
- CGI Scripts, the suexec Wrapper, and other dynamic content techniques
- Error Handling
- SSL
- Performance

The impressive collection of useful code in this book is a guaranteed timesaver for all Apache users, from novices to advanced practitioners. Instead of poking around mailing lists, online documentation, and other sources, you can rely on the *Apache Cookbook* for quick solutions to common problems, and then you can spend your time and energy where it matters most.

### From reader reviews:

#### **William Sebastian:**

Book is actually written, printed, or created for everything. You can realize everything you want by a guide. Book has a different type. We all know that that book is important point to bring us around the world. Close to that you can your reading expertise was fluently. A publication Apache Cookbook will make you to possibly be smarter. You can feel much more confidence if you can know about everything. But some of you think that open or reading any book make you bored. It's not make you fun. Why they are often thought like that? Have you searching for best book or suitable book with you?

#### **Antonia Parham:**

Exactly why? Because this Apache Cookbook is an unordinary book that the inside of the guide waiting for you to snap this but latter it will distress you with the secret it inside. Reading this book adjacent to it was fantastic author who all write the book in such awesome way makes the content interior easier to understand, entertaining technique but still convey the meaning entirely. So , it is good for you because of not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book have such as help improving your proficiency and your critical thinking means. So , still want to hesitate having that book? If I have been you I will go to the reserve store hurriedly.

#### **Ann Potter:**

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you may have done when you have spare time, then why you don't try matter that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Apache Cookbook, it is possible to enjoy both. It is excellent combination right, you still need to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its known as reading friends.

#### **Donald Sigman:**

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is written or printed or descriptive from each source that filled update of news. With this modern era like now, many ways to get information are available for anyone. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the Apache Cookbook when you essential it?
