The Eiffel Tower: The Three-Hundred Metre Tower (English, German, French, Spanish, Italian, Portuguese, Dutch and Japanese Edition) Bertrand Lemoine

The iron colossus: The construction of the Eiffel Tower in drawings and photographs

When it was completed in 1889, the Eiffel Tower was the highest structure in the world, measuring 300 meters (984 feet). Built for the World's Fair, it was initially granted a 20-year permit; this permit was thankfully extended and now the Eiffel Tower is one of the world's most famous structures, **having become practically synonymous with Paris itself** and receiving more than six million visitors annually.

This **reprint** explores the design and construction of this remarkable building; **published in 1900 as a large folio by Gustave Eiffel himself** in a limited edition of 500 copies, the original was never sold on the market—it was exclusively given and donated by Eiffel. **Featuring 53 double-page plates of 4,300 technical drawings** explaining the design as well as **33 photographs of the construction**, the book reveals the complex and fascinating process of bringing the Eiffel Tower to life. Though the technical drawing will especially appeal to designers wishing to discover the engineering genius behind Eiffel's masterpiece, everyone can appreciate this very rare and special book about Paris's glorious mascot.

"This book illustrates the truly remarkable engineering that is the Eiffel Tower and whilst appealing to enthusiasts, can be appreciated by everyone."

—FRENCH MAGAZINE, London
