## Two-Dimensional Carbon: Fundamental Properties, Synthesis, Characterization, and Applications (Pan Stanford Series on Carbon-Based Nanomaterials)

After a brief introduction to the fundamental properties of graphene, this book focuses on synthesis, characterization and application of various types of two-dimensional (2D) nanocarbons ranging from single/few layer graphene to carbon nanowalls and graphene oxides. Three major synthesis techniques are covered: epitaxial growth of graphene on SiC, chemical synthesis of graphene on metal, and chemical vapor deposition of vertically aligned carbon nanosheets or nanowalls. One chapter is dedicated to characterization of 2D nanocarbon using Raman spectroscopy. It provides extensive coverage for applications of 2D carbon in energy storage including supercapacitor, lithium ion battery and fuel cells.

### **From reader reviews:**

#### **Louis Vasquez:**

The book Two-Dimensional Carbon: Fundamental Properties, Synthesis, Characterization, and Applications (Pan Stanford Series on Carbon-Based Nanomaterials) gives you the sense of being enjoy for your spare time. You should use to make your capable much more increase. Book can to be your best friend when you getting pressure or having big problem along with your subject. If you can make examining a book Two-Dimensional Carbon: Fundamental Properties, Synthesis, Characterization, and Applications (Pan Stanford Series on Carbon-Based Nanomaterials) to get your habit, you can get more advantages, like add your personal capable, increase your knowledge about many or all subjects. You can know everything if you like wide open and read a publication Two-Dimensional Carbon: Fundamental Properties, Synthesis, Characterization, and Applications (Pan Stanford Series on Carbon-Based Nanomaterials). Kinds of book are a lot of. It means that, science publication or encyclopedia or some others. So , how do you think about this e-book?

#### **Ila Petty:**

Reading a reserve can be one of a lot of activity that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new facts. When you read a e-book you will get new information due to the fact book is one of many ways to share the information or their idea. Second, looking at a book will make you more imaginative. When you examining a book especially fictional works book the author will bring someone to imagine the story how the character types do it anything. Third, you are able to share your knowledge to other individuals. When you read this Two-Dimensional Carbon: Fundamental Properties, Synthesis, Characterization, and Applications (Pan Stanford Series on Carbon-Based Nanomaterials), you could tells your family, friends and also soon about yours publication. Your knowledge can inspire average, make them reading a reserve.

#### **Bradford Padgett:**

What is your hobby? Have you heard that will question when you got learners? We believe that that issue was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person just like reading or as reading become their hobby. You must know that reading is very important along with book as to be the point. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you take to be your object. One of them is Two-Dimensional Carbon: Fundamental Properties, Synthesis, Characterization, and Applications (Pan Stanford Series on Carbon-Based Nanomaterials).

#### **Omer Brown:**

Reading a book make you to get more knowledge from that. You can take knowledge and information from

your book. Book is composed or printed or descriptive from each source that will filled update of news. With this modern era like today, many ways to get information are available for a person. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just searching for the Two-Dimensional Carbon: Fundamental Properties, Synthesis, Characterization, and Applications (Pan Stanford Series on Carbon-Based Nanomaterials) when you required it?
