Duy Trong Ngo, Tho Le-Ngoc

Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) Duy Trong Ngo, Tho Le-Ngoc

This Springer Brief presents the architectures of small-cell networks and recent advances in interference management. The key challenges and values of small cells are first introduced, followed by the reviews of various small-cell architectures and interference management techniques in both heterogeneous CDMA and heterogeneous OFDMA small-cell networks. New adaptive power control and dynamic spectrum access techniques are discussed to promote a harmonized coexistence of diverse network entities in both 3G and 4G small-cell networks. Analytically devised from optimization and game theories, autonomous solutions are shown to effectively manage the intra-tier and cross-tier interferences in small cells. Informative and practical, this Springer Brief is designed for researchers and professionals working in networking and resource management. The content is also valuable for advanced-level students interested in network communications and power allocation.

From reader reviews:

Micheal McDonough:

This Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) book is just not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this book incredible fresh, you will get info which is getting deeper you read a lot of information you will get. This kind of Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) without we comprehend teach the one who studying it become critical in considering and analyzing. Don't become worry Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) can bring whenever you are and not make your case space or bookshelves' turn into full because you can have it within your lovely laptop even cellphone. This Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) having excellent arrangement in word and layout, so you will not truly feel uninterested in reading.

Irene Delong:

Now a day folks who Living in the era just where everything reachable by connect to the internet and the resources within it can be true or not demand people to be aware of each information they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Reading through a book can help individuals out of this uncertainty Information specially this Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) book since this book offers you rich data and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it you probably know this.

David McClure:

This book untitled Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) to be one of several books that best seller in this year, here is because when you read this e-book you can get a lot of benefit onto it. You will easily to buy this book in the book retail outlet or you can order it through online. The publisher on this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Cell phone. So there is no reason to you to past this e-book from your list.

Earl Wright:

People live in this new morning of lifestyle always make an effort to and must have the extra time or they will get large amount of stress from both way of life and work. So , when we ask do people have extra time, we will say absolutely indeed. People is human not only a robot. Then we inquire again, what kind of activity have you got when the spare time coming to anyone of course your answer will unlimited right. Then do you ever try this one, reading guides. It can be your alternative within spending your spare time, the book

you have read is usually Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science).
