Storyteller Guitar Doug Larson

Every object around us contains the history of all the people and places that brought it here. But rarely is that history explored. In this book, instead of breaking an object apart to reveal those stories, they are told by building the object a guitar named *Storyteller* from scratch.

The text and illustrations reveal the rich lives of the people, places, and projects that breathed life into it. The stories range from people who were pioneers in landscape restoration to those involved with automobile manufacturing. The places include the high arctic, tropical forests, and vertical cliffs of the Niagara Escarpment. The projects include stage plays, laser physics and the establishment of the first Canadian diamond mines. By bringing together these disparate stories in one musical instrument the book makes the argument that art, science, and history are part of everybody's life.
