## **Marine Pollution and Marine Waste Disposal: Proceedings of the 2nd International Congress, San Remo, 17-21 December, 1973 (Progress in Water Technology)**

Marine Pollution and Marine Waste Disposal documents the proceedings of the 2nd International Congress held in San Remo on December 17-21, 1973.

This book is divided into seven main topics-general problems of marine pollution; criteria for marine waste disposal; marine water quality problems; assessment in biological terms of the effects on marine environment; design of treatment and disposal systems; experience with marine waste disposal systems; and research on marine pollution.

In these topics, this compilation specifically discusses the need for international cooperation in coastal resource quality management; criteria for marine waste disposal in Yugoslavia; viral pollution considerations in marine waste disposal; and major pollutants in the marine environment. The conceptual design of marine waste disposal systems; pollution of coastal waters in Italy; and Southern California coastal water research project findings are also covered.

This publication is valuable to marine biologists and environmentalists concerned with marine pollution and waste disposal systems.
