**From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science)** Jean-Pierre Marquis

From a Geometrical Point of View explores historical and philosophical aspects of category theory, trying therewith to expose its significance in the mathematical landscape. The main thesis is that Klein's Erlangen program in geometry is in fact a particular instance of a general and broad phenomenon revealed by category theory. The volume starts with Eilenberg and Mac Lane's work in the early 1940's and follows the major developments of the theory from this perspective. Particular attention is paid to the philosophical elements involved in this development. The book ends with a presentation of categorical logic, some of its results and its significance in the foundations of mathematics.

From a Geometrical Point of View aims to provide its readers with a conceptual perspective on category theory and categorical logic, in order to gain insight into their role and nature in contemporary mathematics. It should be of interest to mathematicians, logicians, philosophers of mathematics and science in general, historians of contemporary mathematics, physicists and computer scientists.

### **From reader reviews:**

#### **Ruth Haakenson:**

Book is to be different for every grade. Book for children right up until adult are different content. We all know that that book is very important usually. The book From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science) was making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The book From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science) is not only giving you far more new information but also to get your friend when you truly feel bored. You can spend your own spend time to read your reserve. Try to make relationship while using book From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science). You never feel lose out for everything when you read some books.

#### **Joe Bell:**

Reading can called mind hangout, why? Because if you find yourself reading a book mainly book entitled From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science) your head will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely will become your mind friends. Imaging each word written in a guide then become one form conclusion and explanation which maybe you never get before. The From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science) giving you yet another experience more than blown away your head but also giving you useful data for your better life in this particular era. So now let us explain to you the relaxing pattern here is your body and mind will likely be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary shelling out spare time activity?

#### **Edwin Courville:**

Is it you actually who having spare time then spend it whole day by means of watching television programs or just resting on the bed? Do you need something new? This From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science) can be the answer, oh how comes? The new book you know. You are and so out of date, spending your time by reading in this brand-new era is common not a nerd activity. So what these books have than the others?

#### **Donna Kerns:**

As a student exactly feel bored for you to reading. If their teacher expected them to go to the library as well as to make summary for some book, they are complained. Just minor students that has reading's internal or real their pastime. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that reading is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this From a Geometrical Point of View: 14 (Logic, Epistemology, and the Unity of Science) can make you

sense more interested to read.
