Education and Technology: Critical Perspectives, Possible Futures

Education and Technology: Critical Perspectives, Possible Futures

There are numerous publications about education and technology. What is missing is a balanced appraisal of the values and cognitive skills technology promotes and those it devalues. This is important for education because the way we teach influences how children think, and it is of more general importance for the evolution of society. If we wait until these issues are definitively resolved and have noticeable societal effects, it will inevitably be too late. Hence the need for informed debate now.
