**Thermochemical Conversion of Biomass for the Production of Energy and Chemicals** Anthony Dufour

This book highlights the processes of biomass thermochemical conversion, covering topics from combustion and gasification, to pyrolysis and liquefaction.

Heat, power, biofuels and green chemicals can all be produced by these thermochemical processes. The different scales of investigation are presented: from the bioenergy chains, to the reactors and molecular mechanisms.

The author uses current research and data to present bioenergy chains from forest to final use, including the biomass supply chains, as well as the life cycle assessment of different process chains.

Biomass conversion reactors are also presented, detailing their technologies for combustion, gasification and syngas up-grading systems, pyrolysis and bio-oil upgrading.

The physical-chemical mechanisms occurring in all these reactors are presented highlighting the main pathways for gas, char and bio-oil formation from biomass.

This book offers an overview of biomass valorization for students, engineers or developers in chemistry, chemical, environmental or mechanical engineering.

### **From reader reviews:**

#### **Jeff Puckett:**

What do you about book? It is not important along? Or just adding material when you want something to explain what the one you have problem? How about your extra time? Or are you busy individual? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Every individual has many questions above. They need to answer that question because just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need that Thermochemical Conversion of Biomass for the Production of Energy and Chemicals to read.

#### **Sharon Doyle:**

This book untitled Thermochemical Conversion of Biomass for the Production of Energy and Chemicals to be one of several books that will best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit onto it. You will easily to buy this book in the book shop or you can order it by way of online. The publisher of the book sells the e-book too. It makes you easier to read this book, because you can read this book in your Mobile phone. So there is no reason to your account to past this publication from your list.

#### **Sherrie Beardsley:**

Reading a e-book can be one of a lot of task that everyone in the world likes. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new data. When you read a guide you will get new information because book is one of several ways to share the information or their idea. Second, looking at a book will make you more imaginative. When you studying a book especially hype book the author will bring that you imagine the story how the personas do it anything. Third, you could share your knowledge to some others. When you read this Thermochemical Conversion of Biomass for the Production of Energy and Chemicals, it is possible to tells your family, friends in addition to soon about yours book. Your knowledge can inspire average, make them reading a publication.

#### **Harold Karr:**

Is it anyone who having spare time after that spend it whole day by watching television programs or just lying on the bed? Do you need something totally new? This Thermochemical Conversion of Biomass for the Production of Energy and Chemicals can be the response, oh how comes? It's a book you know. You are therefore out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these ebooks have than the others?
