Embedded Systems Design Based on Formal Models of Computation

Ivan Radojevic, Zoran Salcic

Embedded Systems Design Based on Formal Models of Computation Ivan Radojevic, Zoran Salcic "Models of Computation for Heterogeneous Embedded Systems" presents a model of computation for heterogeneous embedded systems called DFCharts. It targets heterogeneous systems by combining finite state machines (FSM) with synchronous dataflow graphs (SDFG). FSMs are connected in the same way as in Argos (a Statecharts variant with purely synchronous semantics) using three operators: synchronous parallel, refinement and hiding. The fourth operator, called asynchronous parallel, is introduced in DFCharts to connect FSMs with SDFGs. In the formal semantics of DFCharts, the operation of an SDFG is represented as an FSM. Using this representation, SDFGs are merged with FSMs so that the behaviour of a complete DFCharts specification can be expressed as a single, flat FSM. This allows system properties to be verified globally. The practical application of DFCharts has been demonstrated by linking it to widely used system-level languages Java, Esterel and SystemC.

From reader reviews:

Shirley Frazier:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a move, shopping, or went to the Mall. How about open or maybe read a book eligible Embedded Systems Design Based on Formal Models of Computation? Maybe it is to be best activity for you. You understand beside you can spend your time with the favorite's book, you can better than before. Do you agree with their opinion or you have some other opinion?

Janet Maldonado:

What do you ponder on book? It is just for students because they are still students or the idea for all people in the world, the particular best subject for that? Simply you can be answered for that question above. Every person has various personality and hobby for each other. Don't to be forced someone or something that they don't wish do that. You must know how great in addition to important the book Embedded Systems Design Based on Formal Models of Computation. All type of book is it possible to see on many solutions. You can look for the internet solutions or other social media.

Larry Brackett:

In this period of time globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Typically the book that recommended for you is Embedded Systems Design Based on Formal Models of Computation this book consist a lot of the information of the condition of this world now. That book was represented how does the world has grown up. The dialect styles that writer use for explain it is easy to understand. The writer made some exploration when he makes this book. Here is why this book acceptable all of you.

Sophia Whitfield:

Is it a person who having spare time after that spend it whole day through watching television programs or just lying down on the bed? Do you need something totally new? This Embedded Systems Design Based on Formal Models of Computation can be the respond to, oh how comes? A fresh book you know. You are therefore out of date, spending your free time by reading in this new era is common not a nerd activity. So what these textbooks have than the others?
