Environmental Law and Policy in the European Union and the United States (World Literature; 86)

Randall Baker

Authorities in the fields of environmental and international law and policy, political science, environmental technology, and public administration compare and contrast the ways in which the United States and the European Union handle similar environmental issues.

The contributors critically analyze the influence of culture and history on the way apparently similar developed democracies handle the same problems; they examine the center-state relationship as it applies to EU member countries in contrast to states within the United States; they look at the challenge of transboundary, international, and global environmental problems, and how these relate to the still-emerging geopolitical reconfigurations involved in such structures as NAFTA and the EU; and they examine how transnational resources are handled in the North American and EU contexts. Randall Baker has assembled leading experts who examine significant issues for policymakers and environmentalists in North America and Western Europe.
