Guided Waves in Structures for SHM: The Time - domain Spectral Element Method Wieslaw Ostachowicz, Pawel Kudela, Marek Krawczuk, Arkadiusz Zak

Understanding and analysing the complex phenomena related to elastic wave propagation has been the subject of intense research for many years and has enabled application in numerous fields of technology, including structural health monitoring (SHM). In the course of the rapid advancement of diagnostic methods utilising elastic wave propagation, it has become clear that existing methods of elastic wave modeling and analysis are not always very useful; developing numerical methods aimed at modeling and analysing these phenomena has become a necessity. Furthermore, any methods developed need to be verified experimentally, which has become achievable with the advancement of measurement methods utilising laser vibrometry.

Guided Waves in Structures for SHM reports on the simulation, analysis and experimental investigation related propagation of elastic waves in isotropic or laminated structures. The full spectrum of theoretical and practical issues associated with propagation of elastic waves is presented and discussed in this one study.

Key features:

- Covers both numerical and experimental aspects of modeling, analysis and measurement of elastic wave propagation in structural elements formed from isotropic or composite materials
- Comprehensively discusses the application of the Spectral Finite Element Method for modelling and analysing elastic wave propagation in diverse structural elements
- Presents results of experimental measurements employing advanced laser technologies, validating the quality and correctness of the developed numerical models
- Accompanying website (www.wiley.com/go/ostachowicz) contains demonstration versions of commercial software developed by the authors for modelling and analyzing elastic wave propagation using the Spectral Finite Element Method

Guided Waves in Structures for SHM provides a state of the art resource for researchers and graduate students in structural health monitoring, signal processing and structural dynamics. This book should also provide a useful reference for practising engineers within structural health monitoring and non-destructive testing.

From reader reviews:

Antonio Haynie:

Hey guys, do you wish to find a new book to study? Maybe the book with the subject Guided Waves in Structures for SHM: The Time - domain Spectral Element Method suitable to you? The actual book was written by renowned writer in this era. Typically the book entitled Guided Waves in Structures for SHM: The Time - domain Spectral Element Method is the main of several books that will everyone read now. This kind of book was inspired many men and women in the world. When you read this book you will enter the new age that you ever know previous to. The author explained their strategy in the simple way, so all of people can easily be aware of the core of this guide. This book will give you a large amount of information about this world now. In order to see the represented of the world with this book.

Joni Thompson:

The actual book Guided Waves in Structures for SHM: The Time - domain Spectral Element Method has a lot info on it. So when you check out this book you can get a lot of gain. The book was authored by the very famous author. The writer makes some research just before write this book. This particular book very easy to read you can get the point easily after perusing this book.

Robert Younger:

Beside that Guided Waves in Structures for SHM: The Time - domain Spectral Element Method in your phone, it may give you a way to get more close to the new knowledge or details. The information and the knowledge you may get here is fresh in the oven so don't become worry if you feel like an older people live in narrow small town. It is good thing to have Guided Waves in Structures for SHM: The Time - domain Spectral Element Method because this book offers to you readable information. Do you occasionally have book but you would not get what it's facts concerning. Oh come on, that won't happen if you have this in the hand. The Enjoyable blend here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss it? Find this book as well as read it from today!

Jamila Coles:

A lot of people said that they feel bored stiff when they reading a e-book. They are directly felt that when they get a half portions of the book. You can choose the particular book Guided Waves in Structures for SHM: The Time - domain Spectral Element Method to make your reading is interesting. Your own skill of reading ability is developing when you such as reading. Try to choose straightforward book to make you enjoy to see it and mingle the impression about book and reading especially. It is to be initially opinion for you to like to open a book and read it. Beside that the book Guided Waves in Structures for SHM: The Time - domain Spectral Element Method can to be your new friend when you're feel alone and confuse using what must you're doing of their time.
