## Microfluidics and Microscale Transport Processes (IIT Kharagpur Research Monograph Series)

The advancements in micro- and nano-fabrication techniques, especially in the last couple of decades, have led research communities, over the world, to invest unprecedented levels of attention on the science and technology of micro- and nano-scale devices and the concerned applications. With an intense focus on micro- and nanotechnology from a fluidic perspective, **Microfluidics and Microscale Transport Processes** provides a broad review of advances in this field. A comprehensive compendium of key indicators to recent developments in some very active research topics in microscale transport processes, it supplies an optimal balance between discussions of concrete applications and development of fundamental understanding.

The chapters discuss a wide range of issues in the sub-domains of capillary transport, fluidic resistance, electrokinetics, substrate modification, rotational microfluidics, and the applications of the phenomena of these sub-domains in diverse situations ranging from non-biological to biological ones like DNA hybridization and cellular biomicrofluidics. The book also addresses a generic problem of particle transport in nanoscale colloidal suspensions and includes a chapter on Lattice-Boltzmann methods for phase-changing problems which represents a generic particle based approach that may be useful to address many microfluidic problems of interdisciplinary relevance.

### **From reader reviews:**

#### **Eleanor Williams:**

Reading a guide can be one of a lot of activity that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new facts. When you read a publication you will get new information mainly because book is one of various ways to share the information as well as their idea. Second, looking at a book will make an individual more imaginative. When you examining a book especially hype book the author will bring you to imagine the story how the personas do it anything. Third, you could share your knowledge to other individuals. When you read this Microfluidics and Microscale Transport Processes (IIT Kharagpur Research Monograph Series), you are able to tells your family, friends and soon about yours reserve. Your knowledge can inspire others, make them reading a book.

#### **Kristen Hancock:**

The e-book untitled Microfluidics and Microscale Transport Processes (IIT Kharagpur Research Monograph Series) is the book that recommended to you to learn. You can see the quality of the reserve content that will be shown to anyone. The language that publisher use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, so the information that they share to you is absolutely accurate. You also will get the e-book of Microfluidics and Microscale Transport Processes (IIT Kharagpur Research Monograph Series) from the publisher to make you more enjoy free time.

#### **Neil McNatt:**

The publication with title Microfluidics and Microscale Transport Processes (IIT Kharagpur Research Monograph Series) possesses a lot of information that you can find out it. You can get a lot of advantage after read this book. This book exist new expertise the information that exist in this e-book represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This kind of book will bring you inside new era of the globalization. You can read the e-book with your smart phone, so you can read that anywhere you want.

#### **Katie Broadnax:**

This Microfluidics and Microscale Transport Processes (IIT Kharagpur Research Monograph Series) is completely new way for you who has attention to look for some information since it relief your hunger details. Getting deeper you upon it getting knowledge more you know or you who still having little bit of digest in reading this Microfluidics and Microscale Transport Processes (IIT Kharagpur Research Monograph Series) can be the light food to suit your needs because the information inside this kind of book is easy to get by means of anyone. These books develop itself in the form which is reachable by anyone, that's why I mean in the e-book form. People who think that in reserve form make them feel sleepy even

dizzy this publication is the answer. So there is not any in reading a publication especially this one. You can find what you are looking for. It should be here for you. So , don't miss that! Just read this e-book style for your better life and also knowledge.
