## Zeolite Characterization and Catalysis: A Tutorial

The idea for putting together a tutorial on zeolites came originally from my co-editor, Eric Derouane, about 5 years ago. I first met Eric in the mid-1980s when he spent 2 years working for Mobil R&D at our then Corporate lab at Princeton, NJ. He was on the senior technical staff with projects in the synthesis and characterization of new materials. At that time, I managed a group at our Paulsboro lab that was responsible for catalyst characterization in support of our catalyst and process development efforts, and also had a substantial group working on new material synthesis. Hence, our interests overlapped considerably and we met regularly. After Eric moved back to Namur (initially), we maintained contact, and in the 1990s, we met a number of times in Europe on projects of joint interest. It was after I retired from ExxonMobil in 2002 that we began to discuss the tutorial concept seriously. Eric had (semi-)retired and lived on the Algarve, the southern coast of Portugal. In January 2003, my wife and I spent 3 weeks outside of Lagos, and I worked parts of most days with Eric on the proposed content of the book. We decided on a comprehensive approach that ultimately amounted to some 20+ chapters covering all of zeolite chemistry and catalysis and gave it the title Zeolite Chemistry and Catalysis: An integrated Approach and Tutorial.

### From reader reviews:

#### **Dora Vazquez:**

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to typically the Mall. How about open as well as read a book entitled Zeolite Characterization and Catalysis: A Tutorial? Maybe it is to get best activity for you. You realize beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have some other opinion?

#### **Steven Dillinger:**

In this 21st millennium, people become competitive in most way. By being competitive currently, people have do something to make these survives, being in the middle of typically the crowded place and notice through surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yeah, by reading a e-book your ability to survive improve then having chance to stay than other is high. For you who want to start reading some sort of book, we give you this specific Zeolite Characterization and Catalysis: A Tutorial book as beginner and daily reading e-book. Why, because this book is more than just a book.

#### **Viola Ball:**

Your reading sixth sense will not betray a person, why because this Zeolite Characterization and Catalysis: A Tutorial e-book written by well-known writer who knows well how to make book that could be understand by anyone who also read the book. Written inside good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still question Zeolite Characterization and Catalysis: A Tutorial as good book but not only by the cover but also with the content. This is one guide that can break don't evaluate book by its deal with, so do you still needing a different sixth sense to pick that!? Oh come on your reading sixth sense already said so why you have to listening to a different sixth sense.

#### **Norma Baumgarten:**

Don't be worry in case you are afraid that this book may filled the space in your house, you will get it in e-book means, more simple and reachable. This Zeolite Characterization and Catalysis: A Tutorial can give you a lot of close friends because by you considering this one book you have point that they don't and make you actually more like an interesting person. This kind of book can be one of one step for you to get success. This guide offer you information that maybe your friend doesn't recognize, by knowing more than different make you to be great people. So , why hesitate? Let me have Zeolite Characterization and Catalysis: A Tutorial.
