Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

Event mining encompasses techniques for automatically and efficiently extracting valuable knowledge from historical event/log data. The field, therefore, plays an important role in data-driven system management.

Event Mining: Algorithms and Applications presents state-of-the-art event mining approaches and applications with a focus on computing system management.

The book first explains how to transform log data in disparate formats and contents into a canonical form as well as how to optimize system monitoring. It then shows how to extract useful knowledge from data. It describes intelligent and efficient methods and algorithms to perform data-driven pattern discovery and problem determination for managing complex systems. The book also discusses data-driven approaches for the detailed diagnosis of a system issue and addresses the application of event summarization in Twitter messages (tweets).

Understanding the interdisciplinary field of event mining can be challenging as it requires familiarity with several research areas and the relevant literature is scattered in diverse publications. This book makes it easier to explore the field by providing both a good starting point for readers not familiar with the topics and a comprehensive reference for those already working in this area.

From reader reviews:

Lonnie Bowers:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite guide and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the book entitled Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). Try to stumble through book Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) as your close friend. It means that it can being your friend when you experience alone and beside that course make you smarter than ever before. Yeah, it is very fortunated in your case. The book makes you far more confidence because you can know anything by the book. So , let us make new experience and knowledge with this book.

Sally Norman:

In this 21st millennium, people become competitive in most way. By being competitive now, people have do something to make all of them survives, being in the middle of the crowded place and notice through surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. That's why, by reading a e-book your ability to survive raise then having chance to stand up than other is high. For you who want to start reading the book, we give you this specific Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) book as basic and daily reading book. Why, because this book is greater than just a book.

Louis Hudson:

Beside that Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) in your phone, it could give you a way to get nearer to the new knowledge or data. The information and the knowledge you may got here is fresh in the oven so don't possibly be worry if you feel like an outdated people live in narrow community. It is good thing to have Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) because this book offers to you readable information. Do you occasionally have book but you don't get what it's exactly about. Oh come on, that will not happen if you have this in the hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. Use you still want to miss that? Find this book along with read it from at this point!

Ronald Malone:

Do you like reading a book? Confuse to looking for your best book? Or your book was rare? Why so many problem for the book? But almost any people feel that they enjoy regarding reading. Some people likes studying, not only science book but novel and Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) or even others sources were given information for you. After you know how the truly amazing a book, you feel wish to read more and more. Science book was

created for teacher or even students especially. Those publications are helping them to bring their knowledge. In different case, beside science reserve, any other book likes Event Mining: Algorithms and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) to make your spare time considerably more colorful. Many types of book like this one.
