**Arms on the Market: Reducing the Risk of Proliferation in the Former Soviet Union** Suzette Grillot R

Almost overnight, the massive military-industrial assets of the Soviet Union came under the jurisdiction of fifteen states instead of one established government. While only four states inherited weapons of mass destruction, most of the fifteen states of the former Soviet Union can produce sensitive materials and equipment. Because all the states serve as transit points for both legal commerce and illegal smuggling, developing export control systems in all the newly independent states (NIS) has become the cornerstone of the global effort to reduce the risk of proliferation of weapons of mass destruction.

*Arms on the Market* is the first book to tackle this difficult subject. Not only does it explore the various theoretical approaches that help us understand the development of export control systems in the nis, but it also introduces a unique method for measuring and comparing export control development.
