Slander and libel cases are largely about how one party uses language in ways that are claimed to defame one another. Linguistic expertise can be central to the case. In *The Language of Defamation Cases*, Roger W. Shuy describes eleven representative lawsuits--involving newspapers, television stations, religious leaders, physicians, teachers, entertainers, unions, insurance companies, and manufacturers--for which he served as a consultant. Shuy's linguistic analysis illustrates how grammatical referencing, speech acts, discourse structure, framing, conveyed meaning, intentionality, and malicious language affected the outcome of these cases. *The Language of Defamation Cases* shows how linguistics can be used to help resolve libel and slander cases. It will appeal to students and scholars of applied linguistics and forensic linguistics.
