Donald G. Baker

Electromagnetic Compatibility: Analysis and Case Studies in Transportation Donald G. Baker

Explains and resolves the electromagnetic compatibility challenges faced by engineers in transportation and communications

This book is a mathematically-rich extension of courses required to maintain the Federal Communications Commission (FCC), the Canadian Standards Association (CSA), and the European Union certifications. The text provides an in-depth study of the electromagnetic compatibility (EMC) issues related to specific topics in transportation and communications, including Light Rail Transit, shadow effects, and radio dead spots, through the analysis of real-world case studies in the United States and Europe. The author provides Cartesian, cylindrical, and spherical solutions that can be applied to Maxwell's and Wave Equations. The book covers topics such as SCADA Systems, shielding, and complexities of radio frequencies and their effect on communication houses. The author also provides information for alternative industries to apply the solutions from the case studies and background content to their own professions.

- Presents a series of over twenty real-world case studies related to EMC in transportation and communications
- Covers power line radiation, shadow effects on subway cars, train control systems, and edge distortions
- Includes the OATS testing method and Department of Transportation (DOT) test
- Provides access to a companion website housing power point slides and additional appendices

Electromagnetic Compatibility: Analysis and Case Studies in Transportation is a reference for practicing engineers involved in transportation and communications, as well as post-graduate engineering students studying transportation and communications in engineering.

From reader reviews:

Marie Gambino:

Have you spare time to get a day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to typically the Mall. How about open or even read a book allowed Electromagnetic Compatibility: Analysis and Case Studies in Transportation? Maybe it is for being best activity for you. You understand beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with the opinion or you have different opinion?

Helen Massey:

The book Electromagnetic Compatibility: Analysis and Case Studies in Transportation will bring that you the new experience of reading the book. The author style to elucidate the idea is very unique. Should you try to find new book to learn, this book very suited to you. The book Electromagnetic Compatibility: Analysis and Case Studies in Transportation is much recommended to you to read. You can also get the e-book from official web site, so you can quickly to read the book.

Robert Quinonez:

Your reading 6th sense will not betray you, why because this Electromagnetic Compatibility: Analysis and Case Studies in Transportation reserve written by well-known writer whose to say well how to make book that may be understand by anyone who read the book. Written in good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still question Electromagnetic Compatibility: Analysis and Case Studies in Transportation as good book not only by the cover but also from the content. This is one e-book that can break don't assess book by its include, so do you still needing one more sixth sense to pick this particular!/? Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.

Stephen Redmond:

What is your hobby? Have you heard in which question when you got pupils? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person like reading or as examining become their hobby. You need to know that reading is very important and also book as to be the issue. Book is important thing to provide you knowledge, except your teacher or lecturer. You discover good news or update in relation to something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is niagra Electromagnetic Compatibility: Analysis and Case Studies in Transportation.
