Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) Sally Brooks

Biofortification - the enrichment of staple food crops with essential micronutrients - has been heralded as a uniquely sustainable solution to the problem of micronutrient deficiency or 'hidden hunger'. Considerable attention and resources are being directed towards the biofortification of rice - the world's most important food crop.

Through an in-depth analysis of international rice biofortification efforts across the US, Philippines and China, this book provides an important critique of such goal-oriented, top-down approaches. These approaches, the author argues, exemplify a model of global, 'public goods' science that is emerging within complex, international research networks. It provides vital lessons for those researching and making decisions about science and research policy, showing that if this model becomes entrenched, it is likely to channel resources towards the search for 'silver bullet' solutions at the expense of more incremental approaches that respond to locality, diversity and the complex and uncertain interactions between people and their environments. The author proposes a series of key changes to institutions and practices that might allow more context-responsive alternatives to emerge.

These issues are particularly important now as increasing concerns over food security are leading donors and policy makers to commit to ambitious visions of 'impact at scale' - visions which may never become a reality and may preclude more effective pathways from being pursued.

Published in association with the Economic and Social Research Council (ESRC)

From reader reviews:

Dorothy Trimm:

Playing with family in a very park, coming to see the marine world or hanging out with good friends is thing that usually you will have done when you have spare time, and then why you don't try thing that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability), it is possible to enjoy both. It is good combination right, you still would like to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't buy it, oh come on its called reading friends.

Esther Ponce:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to pick book like comic, quick story and the biggest one is novel. Now, why not attempting Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) that give your fun preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the opportunity for people to know world much better then how they react toward the world. It can't be stated constantly that reading habit only for the geeky man but for all of you who wants to become success person. So , for all of you who want to start studying as your good habit, you can pick Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) become your starter.

Edwin Ball:

That book can make you to feel relax. This book Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) was colorful and of course has pictures around. As we know that book Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) has many kinds or category. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and think that you are the character on there. Therefore , not at all of book are generally make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading that.

Walter Burchett:

What is your hobby? Have you heard that question when you got learners? We believe that that question was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person just like reading or as examining become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update in relation to something by book. Different categories of books that can you decide to try be your object. One of them is niagra Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability).
