Biocatalysis and Agricultural Biotechnology

Biocatalysis and Agricultural Biotechnology

Worldwide energy and food crises are spotlighting the importance of bio-based products – an area many are calling on for solutions to these shortages. **Biocatalysis and Agricultural Biotechnology** encapsulates the cutting-edge advances in the field with contributions from more than 50 international experts comprising sectors of academia, industry, and government research institutes, a virtual *Who's Who* among biocatalysis scientists.

Created Under the Editorial Guidance of Leading Biotechnology Experts

With the aid of numerous graphs and illustrations, this authoritative reference documents such important advances as:

- Cloning and characterization of Kennedy pathway acyltransferases
- Engineering of plants for industrial uses
- New approaches from acquired tolerance to the biotic and abiotic stress of economically important crops

This comprehensive text also explores a variety of bio-based industrial products, including:

- The modification of enzyme character through gene manipulation
- The biocatalytic synthesis of chiral intermediates for drug development

- The use of Omega-3 phospholipid nano capsules as effective forms for transporting immune response modifiers

Providing in-depth reviews of this ancient field and its modern-day advances, **Biocatalysis and Agricultural Biotechnology** is an invaluable lab reference for teachers, graduate students, and industrial scientists conducting research in the biosciences.
