**Computational Logic in Multi-Agent Systems: 5th International Workshop, CLIMA V, Lisbon, Portugal, September 29-30, 2004, Revised Selected and Invited ... / Lecture Notes in Artificial Intelligence)**

The notion of agency has recently increased its influence in the research and development of computational logic based systems, while at the same time significantly gaining from decades of research in computational logic. Computational logic provides a well-defined, general, and rigorous framework for studying syntax, semantics and procedures, for implementations, environments, tools, and standards, facilitating the ever important link between specification and verification of computational systems. The purpose of the Computational Logic in Multi-agent Systems (CLIMA) international workshop series is to discuss techniques, based on computational logic, for representing, programming, and reasoning about multi-agent systems in a formal way. Former CLIMA editions were conducted in conjunction with other major computational logic and AI events such as CL in July 2000, ICLP in December 2001, FLoC in August 2002, and LPNMR and AI-Math in January 2004. The 5th edition of CLIMA was held Lisbon, Portugal, in September 29–30, 2004. We, as organizers, and in agreement with the CLIMA Steering Committee, opted for co-location with the 9th European Conference on Logics in Artificial Intelligence (JELIA 2004), wishing to promote the CLIMA research topics in the broader community of logics in AI, a community whose growing interest in multi-agent issues has been demonstrated by the large number of agent-related papers submitted to recent editions of JELIA. The workshop received 35 submissions – a sensible increase from the previous edition. The submitted papers showed that the logical foundations of multi-agent systems are felt by a large community to be a very important research topic, upon which classical AI and agent-related issues are to be addressed.

**From reader reviews:**

**Ginger Knowles:**

Book is to be different per grade. Book for children until adult are different content. As it is known to us that book is very important for us. The book Computational Logic in Multi-Agent Systems: 5th International Workshop, CLIMA V, Lisbon, Portugal, September 29-30, 2004, Revised Selected and Invited ... / Lecture Notes in Artificial Intelligence) ended up being making you to know about other information and of course you can take more information. It is rather advantages for you. The e-book Computational Logic in Multi-Agent Systems: 5th International Workshop, CLIMA V, Lisbon, Portugal, September 29-30, 2004, Revised Selected and Invited ... / Lecture Notes in Artificial Intelligence) is not only giving you considerably more new information but also for being your friend when you experience bored. You can spend your current spend time to read your e-book. Try to make relationship with all the book Computational Logic in Multi-Agent Systems: 5th International Workshop, CLIMA V, Lisbon, Portugal, September 29-30, 2004, Revised Selected and Invited ... / Lecture Notes in Artificial Intelligence). You never sense lose out for everything should you read some books.

**Richard Williams:**

This book untitled Computational Logic in Multi-Agent Systems: 5th International Workshop, CLIMA V, Lisbon, Portugal, September 29-30, 2004, Revised Selected and Invited ... / Lecture Notes in Artificial Intelligence) to be one of several books that will best seller in this year, that is because when you read this e-book you can get a lot of benefit in it. You will easily to buy that book in the book retailer or you can order it via online. The publisher in this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smartphone. So there is no reason for you to past this reserve from your list.

**Kyle Gill:**

A lot of people always spent their free time to vacation or maybe go to the outside with them household or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you want to try to find a new activity this is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book which you read you can spent the entire day to reading a guide. The book Computational Logic in Multi-Agent Systems: 5th International Workshop, CLIMA V, Lisbon, Portugal, September 29-30, 2004, Revised Selected and Invited ... / Lecture Notes in Artificial Intelligence) it is quite good to read. There are a lot of people that recommended this book. They were enjoying reading this book. Should you did not have enough space to create this book you can buy the particular e-book. You can m0ore quickly to read this book through your smart phone. The price is not too costly but this book has high quality.

**Martin Hobson:**

What is your hobby? Have you heard that question when you got learners? We believe that that issue was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you also know that little person including reading or as reading become their hobby. You must know that reading is very important and also book as to be the factor. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You see good news or update regarding something by book. Amount types of books that can you take to be your object. One of them is niagra Computational Logic in Multi-Agent Systems: 5th International Workshop, CLIMA V, Lisbon, Portugal, September 29-30, 2004, Revised Selected and Invited ... / Lecture Notes in Artificial Intelligence).
