New Ideas in Low Dimensional Topology (Series on Knots and Everything) Kauffman Louis H Et Al

This book consists of a selection of articles devoted to new ideas and developments in low dimensional topology. Low dimensions refer to dimensions three and four for the topology of manifolds and their submanifolds. Thus we have papers related to both manifolds and to knotted submanifolds of dimension one in three (classical knot theory) and two in four (surfaces in four dimensional spaces). Some of the work involves virtual knot theory where the knots are abstractions of classical knots but can be represented by knots embedded in surfaces. This leads both to new interactions with classical topology and to new interactions with essential combinatorics.

From reader reviews:

Ronald Johnson:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each e-book has different aim as well as goal; it means that publication has different type. Some people truly feel enjoy to spend their time for you to read a book. These are reading whatever they acquire because their hobby is definitely reading a book. Think about the person who don't like looking at a book? Sometime, man feel need book if they found difficult problem or exercise. Well, probably you should have this New Ideas in Low Dimensional Topology (Series on Knots and Everything).

Carol Rosborough:

In this 21st century, people become competitive in every way. By being competitive right now, people have do something to make all of them survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yes, by reading a guide your ability to survive increase then having chance to remain than other is high. For you personally who want to start reading the book, we give you this New Ideas in Low Dimensional Topology (Series on Knots and Everything) book as basic and daily reading reserve. Why, because this book is more than just a book.

John Jeanbaptiste:

The publication untitled New Ideas in Low Dimensional Topology (Series on Knots and Everything) is the book that recommended to you to see. You can see the quality of the guide content that will be shown to you actually. The language that publisher use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, to ensure the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of New Ideas in Low Dimensional Topology (Series on Knots and Everything) from the publisher to make you more enjoy free time.

Joseph Levis:

Spent a free the perfect time to be fun activity to do! A lot of people spent their free time with their family, or their very own friends. Usually they carrying out activity like watching television, gonna beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Could be reading a book is usually option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the book untitled New Ideas in Low Dimensional Topology (Series on Knots and Everything) can be excellent book to read. May be it can be best activity to you.
