**The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology)** Mark Vellend

A plethora of different theories, models, and concepts make up the field of community ecology. Amid this vast body of work, is it possible to build one general theory of ecological communities? What other scientific areas might serve as a guiding framework? As it turns out, the core focus of community ecology—understanding patterns of diversity and composition of biological variants across space and time—is shared by evolutionary biology and its very coherent conceptual framework, population genetics theory. *The Theory of Ecological Communities* takes this as a starting point to pull together community ecology's various perspectives into a more unified whole.

Mark Vellend builds a theory of ecological communities based on four overarching processes: selection among species, drift, dispersal, and speciation. These are analogues of the four central processes in population genetics theory—selection within species, drift, gene flow, and mutation—and together they subsume almost all of the many dozens of more specific models built to describe the dynamics of communities of interacting species. The result is a theory that allows the effects of many low-level processes, such as competition, facilitation, predation, disturbance, stress, succession, colonization, and local extinction to be understood as the underpinnings of high-level processes with widely applicable consequences for ecological communities.

Reframing the numerous existing ideas in community ecology, *The Theory of Ecological Communities* provides a new way for thinking about biological composition and diversity.

### **From reader reviews:**

#### **Troy Ethridge:**

This The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology) usually are reliable for you who want to be described as a successful person, why. The explanation of this The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology) can be one of the great books you must have is giving you more than just simple reading food but feed you with information that perhaps will shock your prior knowledge. This book will be handy, you can bring it everywhere and whenever your conditions in the e-book and printed ones. Beside that this The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology) giving you an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we realize it useful in your day exercise. So , let's have it and luxuriate in reading.

#### **Steven Peterson:**

The book untitled The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology) is the publication that recommended to you to learn. You can see the quality of the publication content that will be shown to anyone. The language that article author use to explained their ideas are easily to understand. The writer was did a lot of study when write the book, so the information that they share to you is absolutely accurate. You also can get the e-book of The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology) from the publisher to make you considerably more enjoy free time.

#### **Martina Smith:**

Don't be worry for anyone who is afraid that this book will filled the space in your house, you could have it in e-book technique, more simple and reachable. This The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology) can give you a lot of friends because by you considering this one book you have factor that they don't and make you more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that possibly your friend doesn't understand, by knowing more than additional make you to be great folks. So , why hesitate? Let me have The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology).

#### **Jewell Brundage:**

Reading a e-book make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is composed or printed or illustrated from each source this filled update of news. On this modern era like right now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just trying to find the The Theory of Ecological Communities (MPB-57) (Monographs in Population Biology) when you required it?
